GOAL-AIR

ENJOY SEATING PERFORMANCE.

GOAL-AIR. PLEASANT. FRESH. VERSATILE.

Creative and corporate. Its price-performance ratio is more than agreeable and creates space for further acquisitions in the office. Therefore, it appeals to a wide variety of people in a wide variety of professions.

172G

Swivel chair, mesh backrest, synchronous mechanism, weight adjustment (T-armrests, aluminium base in brilliant silver and lumbar support optional)

175G

Swivel armchair with headrest, mesh backrest, synchronous mechanism, weight adjustment (T-armrests, aluminium base in brilliant silver and lumbar support optional)

172G

Goal-Air as cantilever chair gives a decent and sovereign look to your office.

570G

Cantilever frame,
with arm pad,
mesh backrest,
stackable

Beautifully designed and rolling backrest, workmanship with a loving attention to detail.

The headrest can be adjusted in height, depth and incline.

Intuitive control lever to adjust to your body weight, large spectrum from 45 kg – 130 kg.

The seat depth adjustment makes it possible to individually adapt the chair to the length of your thighs.

THE NEXT POSITION IS THE BEST

FROM THE SEATING SPECIALISTS

Fact: from an anatomical point of view ergonomics means movement because movement is a critical part of office health. It is a law of nature that effective work processes are one of the most important sources of value-added in the company. Back problems are the greatest causes of absenteeism. A good chair will not heal your back but it is good preventive medicine and eases the pain for those who already suffer. What does an Interstuhl chair do? The patient therapist offers support in each posture. It generates a feeling of well-being in all positions and brings measurable relief.

Naturally, the courage to follow our philosophy of dynamic sitting has meant a break with all the old rules: majestic, immaculate and bolt upright vs. the new philosophy of doing it with gusto, reclining, lounging, looking out the window, concentrating.

You can sit however you want. Just sit on the right chair." Each new product development with leading research institutes reconfirms this and it is substantiated by scientific input. The result: Interstuhl chairs accommodate every posture so ergonomically that maximum support is ensured.

1. Synchronous mechanism

The synchronous movement of the seat and backrest provides optimum support for the back in every position; the push effect is eliminated.

2. Mechanical sprung column

This ensures that the spine, which is very sensitive to vertical jolts, is not subjected to excessive loads when sitting down, even at the lowest seat height.

3. Base seat height setting

The seat height is a precondition for good sitting. The base seat height adjustment extends the DIN-defined adjustment range and allows ideal sitting for short or tall users.

4. Weight adjustment

The individually adjustable counter-pressure of the backrest permits correct sitting for both light and heavy users.

5. Back height adjustment

The support range for the lumbar spine can be ideally adjusted to the height of the user.

6. Seat depth adjustment

Regulates the distance between the backrest and front edge of the seat, thus providing optimum support for the upper thighs; even for taller users.

7. Adjustable seat inclination

Multiple adjustment of the seat in a forwards direction stops the pelvis from tilting back. This relieves the spine and avoids a poor posture.

8. Adjustable lumbar support

The horizontally adjustable lumbar support adapts to the individual curve of the lumbar spine; this reduces the muscle strain.

9. Adjustable armrests

Height adjustment to take the strain off the neck muscles. Width adjustment and pivoting for optimum support angle, depth adjustment for optimum distance to the desk.

10. Headrest

The neck and shoulder muscles are relieved by the headrest when you lean back.

Hans-Georg Piorek

Product design:

Goal-Air comes from the industrial design studio of Hans-Georg Piorek. “Never put up with something that is just about good enough” – this thought is at the basis of Piorek’s design products, creating the connection between the tried-and-tested and the innovative. Goal-Air has succeeded in creating a fresh, versatile and transparent office chair which provides the user comfort with lots of options, two mesh colours and a surprising price category.
